Hi Kent,

Good to speak to you. See the attachments and email below. The red outlined rock piles are what I was assuming to be the rip rap piles discussed. The north facing highwall near the property line on city property is where there are some big limestone blocks that I imagine Keith might want to cut someday (See the pano1.jpg).

This area is not bermed at the property line, but a high berm in the area of the photo would keep traffic from going further onto city land or from city to Keith McKay's land.

I'll forward the latest inspection report to you when finalized. Thanks.

Peter
